Professional Summary

Result-driven Data Professional and web developer with combined experience in data engineering and data analysis roles. Proven record in designing and implementing data pipelines, ETL processes frontend development and data warehousing solutions. Prior experience as Data Analyst has provided a strong foundation in data visualization, statistical analysis and deriving actionable insights from complex datasets. Adept at collaborating with cross-functional teams to understand business requirements and deliver scalable data solutions. Committed to continuous learning and staying abreast with new developments and trends in data engineering and analytics

Holds professional certificates in data analytics and Business Intelligence respectively by Google and Coursera and also a bachelor's degree in Natural Resources Management from the University of Energy and Natural Resources.

Skills

- **Web Development and Languages:** Python, HTML, CSS, Javascripts, SQL, PL/SQL, Oracle Apex.
- **Database Management:** Postgresql, SQL Server, Oracle database
- **Data Storage Modelling and Warehousing:** Postgres, bigQuery, Snowflake, draw.io GCS, AWS S3
- **Version Control:** Git
- **Cloud Computing**: Google Cloud, Oracle Cloud
- **Workflow Orchestration & Containerization**: Airflow, Dagster, Docker, Terraform
- **Data analysis & Visualization**: Tableau, Power BI, SQL, python
- **Other data Engineering Competencies:** Data Build Tool(dbt), Airbyte, Fivetran

Projects

End-to-End Data pipeline project: This project demonstrates the seamless extraction, transformation and analysis of data for thorough data-driven decision making and analysis. For more information on this project kindly visit https://stanleybankesie.github.io/data_projects.html

E-Commerce Dashboard using HTML, CSS and JavaScript: This project offers a centralized interface that showcases essential metrics such as sales, customer insights, product performance, and revenue analysis. For more information on this project kindly visit https://stanleybankesie.github.io/frontend_projects.html

Data modelling and warehouse creation: This project demonstrates the processes of data modelling and design as well as setting up of a data warehouse using the snowflake web UI to support analytics and reporting requirements. Kindly visit https://stanleybankesie.github.io/data_projects.html for more information

Work History

Business Intelligence Analyst / **Italian Trading House**   Sept 2022 – Feb 2023

- Created thought provoking and visually appealing insights and trends of institutional data which management used for decision making, this saved the company from an unforeseen loss.
- Led a group of five in conducted feasibility studies for an international company who wish to enter Ghana's pet food market.
